“ Dear Cannon Family, I honor all of you and Dolores. The gifts, the knowledge, and the reassurance that she brought to this world can never be forgotten. Years ago, I listened to her, then life took a different turn for awhile. I recently began to listen again, and she confirmed so much of what I thought I knew. I remember the library, a big stone library with an enormous book on one of the tables. I've often said I can hardly wait to go back. But, not yet - we all have so much to do as the new earth comes in completely. I send all of you my very best wishes and blessings, and love to all. Suzanne

“ *I first met dolores in my hometown at the local department of human services office she was very kind to me and spoke with me about my aura even predicted somethings that would happen in my life that did happen. I wish I could have been more open to what she was telling me I was still young and had gone through alot of trauma after that day I didn't remember her name for a few years. I've been so lost and broken and I know I could have called on her to help me. I'm figuring this life out on my own and it's scared sometimes I really wish I heard her voice again it was calming.*

“ "A life well lived is a life worth living." I think that sums up Dolores Cannon, at least in the eyes of someone who's own life has been bettered by her presence, her writings, and her words. I am very thankful for her life, for her contribution to the betterment of humanity.

“ *As a former past life regressionist, I have been fascinated by Dolores' work and had thought of training with her to deepen my induction techniques. The information she was able to bring forth was truly amazing and informative in ways no one else can match. I devoured the 4 Convoluting Universe books this year and am looking forward to a promised 5th one. Now I am reading up every book of hers I can find! She added so much to our body of knowledge and visions of potential futures. She was well-loved, even by "strangers" such as myself. She will be sorely missed. I can only imagine that she has work to do on the other side of the veil as we approach "ascension moment" and I consider her one of humanity's Guardian Souls. Blessings to her family at this difficult time. But what a life she lived!*

“ *Delores Cannon's books meant so much to me when I first found them a few months after my 33 year old daughter died unexpectedly a little over three years ago. It was a pleasure to have my mind 'twisted like a pretzel' as I read her reports of information gleaned during regressions and later more directly as she proved her worth as a reporter. I did not realize until I read her obituary, that she shared her birthday with my late daughter- just another reason to cherish the comfort she provided me. Thank you, Delores, for your fearless courage and for all the lives you touched through your work! Bon voyage.*
